

ALLIGATOR[®]

MORE CONTROL..

ALLIGATOR

STAR PRODUCT

INTRODUCTION

Alligator cables was founded in 1976 by Chairman Mr. Ken Yen Wen in Taiwan under the trading name of Liu Yih.

At its inception, and with only 5 employees manufacturing brake and control cables for the bicycle, motorcycle and automobile industries, Mr. Wen laid out the principles of dedication to quality and innovation that have guided our company through over two decades of steady growth.

Over the past two decades Alligator cables has gone through many changes adapting to both changes within the industry and steady growth.

In 1994 the factory was relocated to a larger and more advanced facility in order to cope with increased demand for our product. Numerous modernization programs to computerize and automate as much of our operations as possible have accompanied this growth.

Today Alligator cables stands as one of the world's premier manufacturers and designers of bicycle cables with over 15 patents worldwide to show for our unrelenting dedication towards improving cycling through innovative design.

We have over 60 employees, a factory size of over 2344 square meters, and various international quality certifications including TS16949, BSI ISO 9002.

All our products are covered by US\$1,000,000 product liability insurance worldwide.

CABLE STRUCTURE

CABLE STRUCTURE

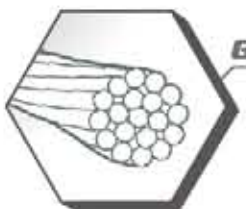

SLICK GALVANIZED

Pre-stretched galvanized steel with flat formed surfacing for reduced friction.

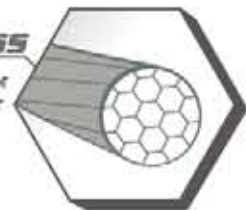

P.T.F.E. GALVANIZED

P.T.F.E. coated galvanized steel cables are thermo bonded to drastically improve performance and reduce friction. Cables are pre-stretch for precise shifting & braking, self-lubricating and weatherproof. Low maintenance.

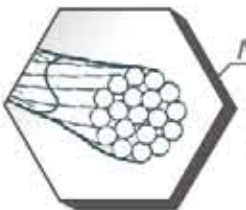

GALVANIZED STEEL

Very reliable, cost effective and durable.

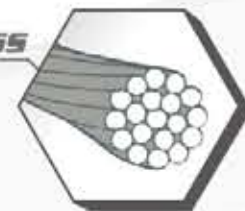

SLICK STAINLESS

Cables are formed with flat surfaces for reduced friction, corrosion resistant for longevity and pre-stretch for precise braking and shifting.

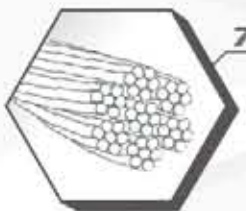

NYLON COATED

Coated cable for corrosion resistant and frictionless.

STAINLESS

Corrosion resistant

7X7 STRAND

Flexible 49 strands designed for excessive bends in your cable system.
